1. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. The instantly claimed recitation of "miniemulsion" is not clearly defined in the instant specification. It is not a technically recognized term. It is unclear what limitations "miniemulsion polymerization" requires therefore. The scope of the instant claims is therefore unclear.

B. The instant claims recite "including" prior to various claimed groups. It is unclear if these groups preceded by "including" are intended to be Markusch groups or if these are merely preferred embodiments or if the claims are limited to these preferred embodiments or encompass other unclaimed embodiments and if so what these unclaimed embodiments may be.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 933512 Langerak et al..

Langerak discloses an emulsion polymerization of the instantly claimed amounts of ingredients under the instantly claimed conditions such that it must necessarily inherently be a "miniemulsion polymerization". See page 1, lines 32-83, particularly 45-83; page 2, lines 1-127, particularly 1-55; and the remainder of the document.
